

IPv6 Korea Council providing IPv6 consulting to Kwater.

IPv6 Korea Council, is consulting the Korea Internet & Security Agency services (Hereinafter called KISA) in 2017, on IPv6 Design and Deployment Consulting (Hereinafter called IPv6 consulting) since November 2017 for the Korea Water Resources Corporation (Hereinafter called Kwater). Kwater is an organization that manages the water resources of the Republic of Korea and is responsible for the construction and operation management of water facilities including water, dams and floods, and the installation and operation of new and renewable energy facilities.

IPv6 Consulting for Kwater

In order to verify IPv6 operation, stability, and performance in applications operated by actual users by differentiating from the method focused on existing server, PC, network equipment, and security equipment, we are concentrating in applying the specific application of organization.

We find the potential problems and suggest the solution that may arise when business areas including applications, DBs, and authentication systems are separated or connected to IPv4 and IPv6 by dual stack.

We will deliver the best ISP (Information Strategy Planning) that can be of practical help in the IPv6 transition of Kwater who is public organization at the forefront of adapting IPv6
