The screenshot shows the White House website with a navigation bar including 'Home', 'The White House President George W. Bush', 'News & Policies', 'President Deal Office', 'Vice President VP Office', 'History & Tours Blue Room', and 'First Lady East Wing'. The main content area features a 'Policies in Focus' section with a link to 'SECURE CYBERSPACE'. Below this is a large article titled 'DOD Commits to IPv6' with a sub-header 'The National Strategy to Secure Cyberspace'. The article text states: 'The National Strategy to Secure Cyberspace is part of our overall effort to protect the Nation. It is an implementing component of the National Strategy for Homeland Security and is complemented by a National Strategy for the Physical Protection of Critical Infrastructures and Key Assets. The purpose of this document is to engage and empower Americans to secure the portions of cyberspace that they own, operate, control, or with which they interact. Securing cyberspace is a difficult strategic challenge that requires coordinated and focused effort from our entire society, the federal government, state and local governments, the private sector, and the American people.' A link '(Click here to download entire Strategy)' is provided. Below the article is a photo of Mr. John L. Osterholz.

SUBJECT:

Transition Planning for Internet Protocol Version 6 (IPv6)

Office of Management and Budget Memorandum August 2, 2005

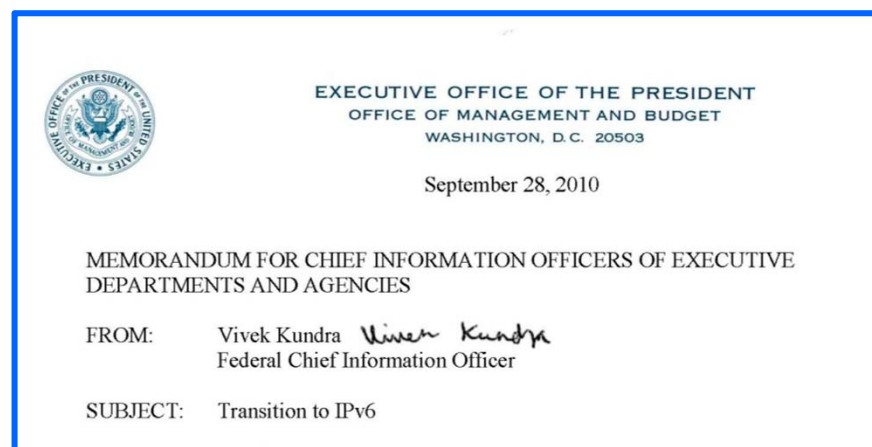

▶ US Government IPv6 Leadership

Memo to CIOs: Transition to IPv6 (September 28, 2010)

Federal Acquisition Regulation (FAR)

- DoD, GSA, and NASA published a proposed rule in the Federal Register at 71 FR 50011, **August 24, 2006**, to amend the FAR to ensure that all new IT acquisitions using Internet Protocol are IPv6 compliant.
- The Civilian Agency Acquisition Council and the Defense Acquisition Regulations Council (Councils) issued a final rule amending the FAR to require that IPv6-compliant products be included in all new IT acquisitions using Internet Protocol effective **December 10, 2009**.
- Starting **July 2010** US to sell into the US Gov, products will need to be compliant to the NIST USGv6 v1 profile

▶ US Federal agencies CIO IPv6 Working Group

- US Federal agencies CIO IPv6 Working Group

AND

- National Telecommunications and Information Administration (NTIA)
 - Set up an infrastructure for federal departments and agencies to request IPv6 addresses
 - Set up a working group to further assist in the transition
 - How agencies should incorporate IPv6 into their enterprise architectures and strategic plans.
 - Talk about the technical details of how to develop a transition plan.
 - How to set up governance of IPv6 implementation.
 - Procurement and acquisition issues.
